Intended Audience: Special Education Teachers, Directors, and Assessment Coordinators working with MAP-A

Date: February 17, 2006

MAP-Alternate Update

Please note that a glitch in the "Print All" function has been found in the ProFile software program provided as a tool for the 2005-2006 MAP-A administration. To address this issue an upgrade program has been created for ProFile. No student data already entered into your ProFile program will be lost by adding the upgrade.

Please access the ProFile Upgrade at:

<http://www.measuredprogress.org/Assessments/Overview.html> click on Special Education Resources, then under the Software heading click on ProFile, finally click on Missouri (towards the bottom of the page).

There is a pdf instruction file that should be printed first: Measured Progress ProFile - Version FG Upgrade Instructions. Follow the instructions to download the upgrade. If you encounter any difficulties, please contact John Cunningham, Measured Progress, by e-mail (preferred) at [jcunningham@measuredprogress.org](mailto:jcunningham@measuredprogress.org) or toll free at 866-834-8880.

You will not need to download the upgrade if you download the complete ProFile version after January 31, 2006. The version posted to the website at that time will include the upgrade in it. However, if you have previously downloaded ProFile, download only the upgrade so that entered data is not lost.
